ICCSimTMat for Fiserv
Information Sheet

The ICCSimTMat for Fiserv features a powerful user friendly Interface- enabling efficient test campaigns, offering exceptional value and designed to be totally self-contained with no other components required.

With the ICCSimTMat for Fiserv, there's no need for complex hardware, a restrictive card adaptor, separate spy software or huge card decks.

The test suite has been designed to integrate with the Fiserv portal - allowing access to projects and the ability to upload logs, during or after the testing phase.

fiserv.
